ABOUT US

Kuvela Velocity Screening (Pty) Ltd is a specialized manufacturer and supplier of screening surfaces and accessories to the local and international Mining and Aggregate industries.

We manufacture and supply a full and comprehensive range of woven wire screen media and injection moulded polyurethane and rubber panels to suit a vast range of applications and industries.

The Kuvela Velocity Screening Team is made up of a dedicated and experienced team of professionals with more than 100 years of collective industry experience in the design, manufacture, supply, and commissioning of screening media.

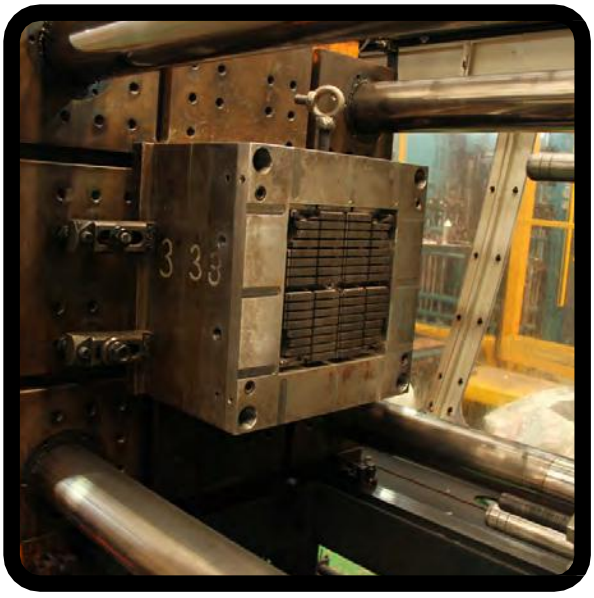

WE ARE COMMITTED TO SERVICE EXCELLENCE

- Excellence in product design and quality.
- Excellence in delivering innovative engineered solutions.
- Excellence in technical support.
- Excellence in on-time delivery.

ABOUT US

WOVEN WIRE SCREENING

Woven wire screens have been used across various industries for decades. Kuvela Velocity Screening manufactures and supplies the largest range of woven wire screens and accessories to the local and international markets. Wire diameters range from 0.9mm to 12.5mm with aperture sizes of up to 200mm, in various aperture configurations.

Kuvela Velocity Screening's range of woven wire screens, include, but are not limited to:

- Square aperture screens – sinus weave, lock crimp, double lock crimp.
- Slotted screens – single, double, and triple shute construction.
- Flat top construction.
- Harp screens – Tria harp and square harps.
- Materials include high carbon, mild steel, SS304, SS316 and galvanized mild steel.

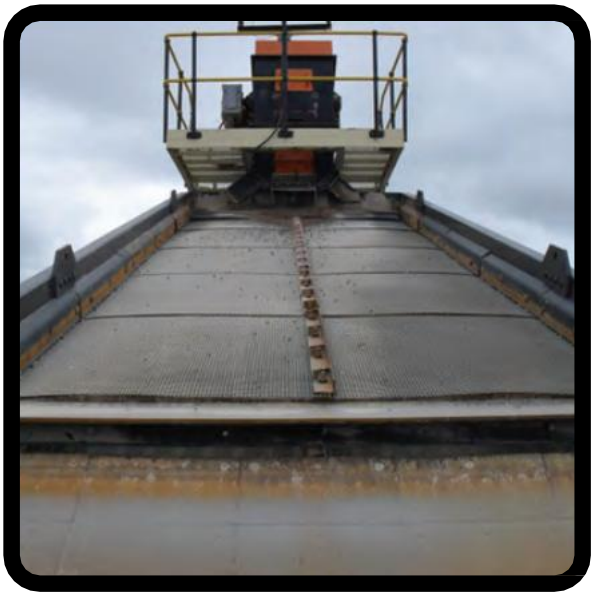

Overhook specs and finishing, include, but are not limited to:

- 45º Overhook.
- 45º Weld on overhook.
- 45º Metal edge overhook.
- C-shape overhook.
- C-shape weld on overhook.
- C-shape metal edge overhook.

Kuvela Velocity Screening also manufactures and supplies the following screening accessories:

- 2 Bend and 3 bend clamping plates.
- Tensioning bolt assemblies as well as individual parts.
- Complete range of nosing/capping rubber.

WOVEN WIRE SCREENING

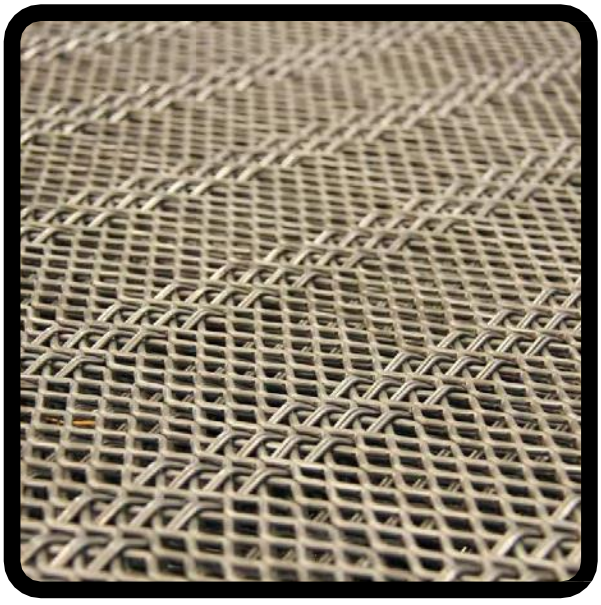

MODULAR INJECTION MOULDED SCREEN PANELS

Polyurethane and Rubber as screening surfaces can offer certain advantages. However, due to open area variations, consideration should be given to the basic laws of screening and efficiencies when choosing to convert to Polyurethane or Rubber screening surfaces.

Kuvela Velocity Screening manufactures and supplies a full range of modular injection moulded polyurethane and rubber panels to the local and international markets.

We offer a large range of aperture configurations to suit any screening application in the industry. Our state-of-the-art engineering facility offers flexibility in design and allows us to manufacture any special aperture requirements for any industry in a very short turnaround time.

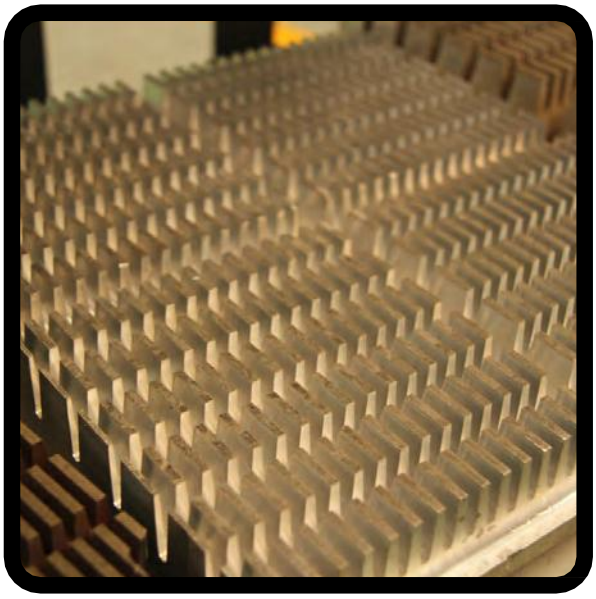

Polyurethane and Rubber modular panels range from 0.3 x12 slots to 110mm in various thicknesses and fixing methods. We also offer custom-designed internal frames to suit different applications.

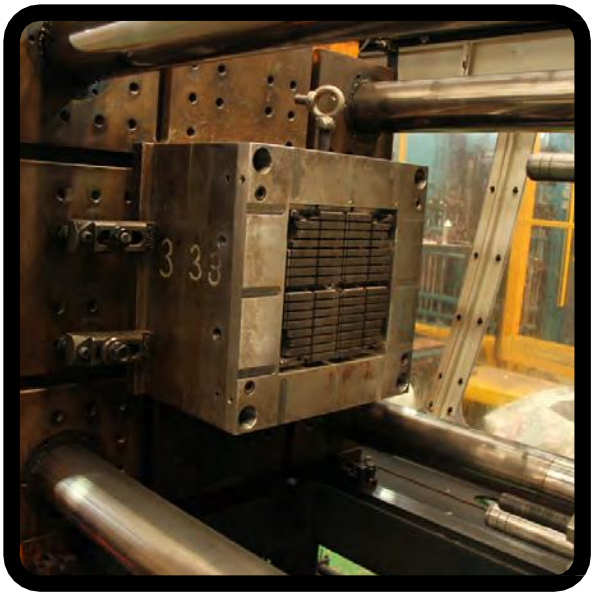

Bolt down Rubber panels:

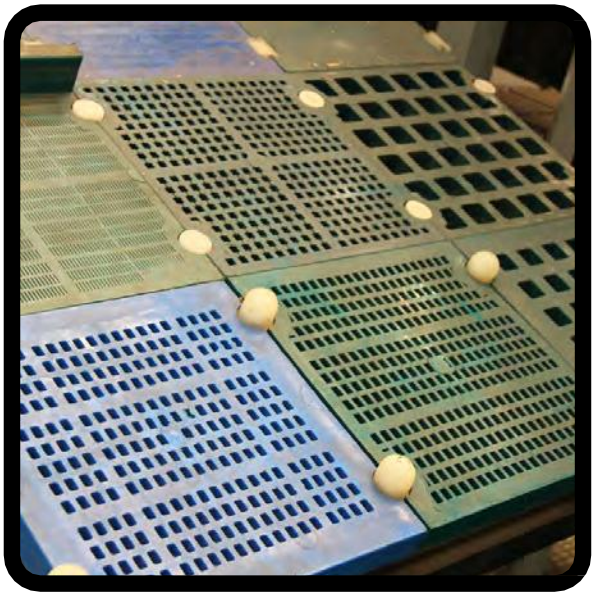

- A wide range of self-relieving apertures are available for various applications.
- Various thicknesses from 30mm to 80mm.
- Custom designed internal frames for heavy duty applications.
- Custom design as per client requirements.
- Injection moulded and compression moulded panels available in compounded synthetic and natural rubber.
